REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of making a bumper beam extension using gas assist injection molding, the step of closing selected sections of the multipart die, while the material is malleable, to form a bight section joining an upper wing and a lower wing of a main body section, wherein the bight section tapers from a preselected distance from a forward wall of the main body portion until it is face to face with the forward wall. Close prior art is Fujioka et al. (US Patent 5,635,117) and Loren (US Patent 5,100,187), which both teach forming a bumper by the gas assist method, but does not teach the die closing step.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne E. McDowell whose telephone number is (703) 305-4018. The examiner can normally be reached on M-F 6:30-4.
